MAKEABILITY LAB

# Project **Sidewalk** was here in 2015!

Graduated in 2016!

Me!

# Quick Recap

# 30.6

million U.S. adults with mobility impairment

# 15.2

million use an assistive aid

Missing Curb Ramp

Obstacle

Surface Problem

No Sidewalk

The problem is that **there are few mechanisms to determine accessible areas of a city *a priori***

The lack of street-level accessibility information can have a significant impact on the **independence** and **mobility** of citizens

# OUR VISION

Design systems that transform the way accessibility information is **collected** and **used**.

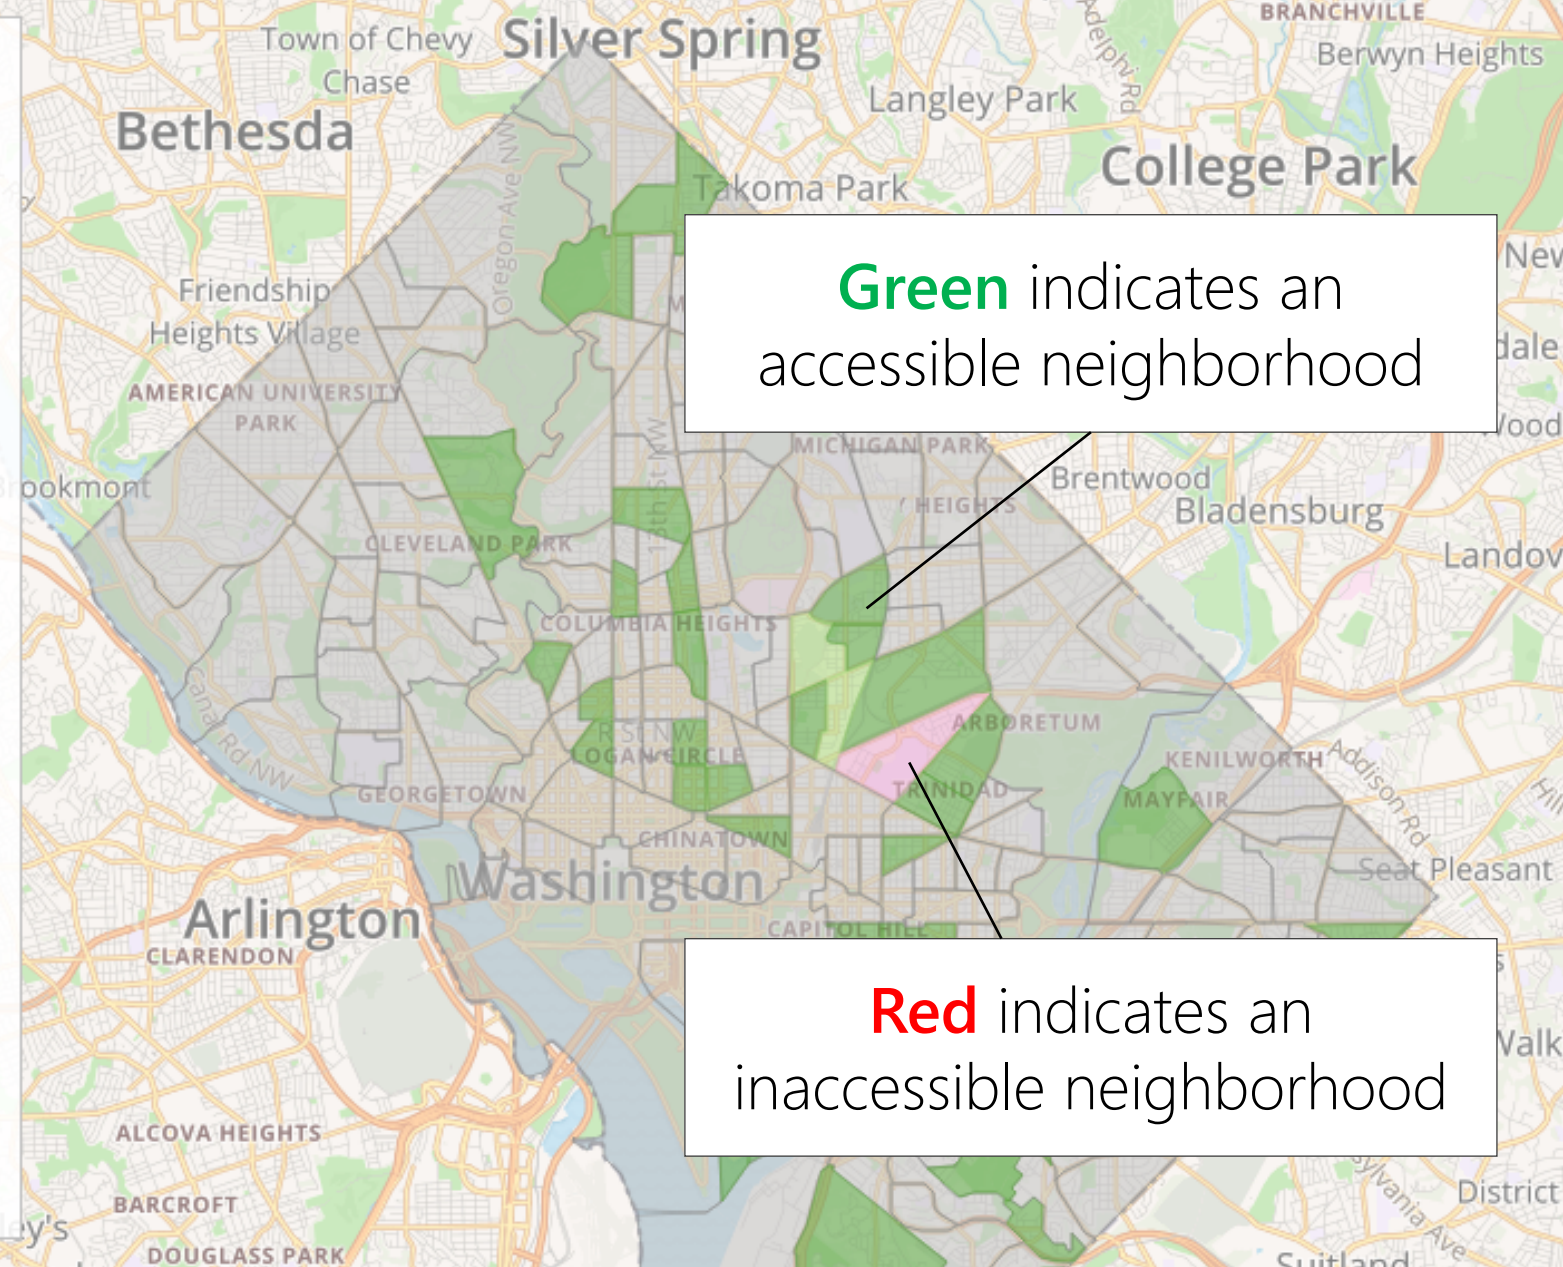

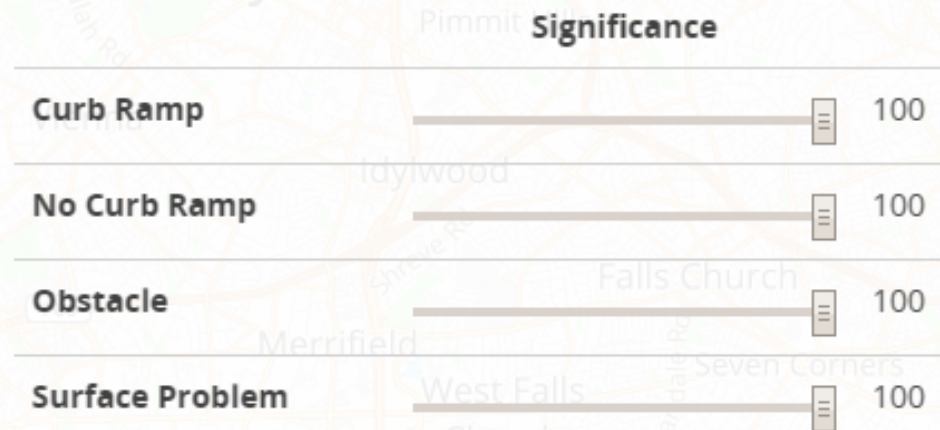

## Access Score in Action

Find out about neighborhood accessibility of DC! Here, accessible neighborhoods are colored in **green** and inaccessible neighborhoods are colored in **red**.

If some accessibility features affect your mobility more than the others, use the slider below to adjust the significance of each accessibility feature!

Note, we don't have enough data to reliably calculate Access Score for some neighborhoods (yet). Wanna help us improve it? [Participate in accessibility audit!](#)

# Proof-of-Concept Application of Accessibility Data

# Accessibility-aware Navigation

**THESE APPLICATIONS HAVE**

**HUGE  
DATA**

**REQUIREMENTS**

**THESE APPLICATIONS HAVE**

**HUGE  
DATA**

**REQUIREMENTS**

*Where is this  
data going to  
come from?*

**Our Approach:** Remotely collect street-level accessibility information from Google Street View (GSV) using crowdsourcing and computation

Incomplete Sidewalks

Physical Obstacles

Surface Problems

No Curb Ramps

Stairs/Businesses

# **Developments since 2015**

1

PROJECT  
**SIDEWALK**

**New Branding!**

2

Accessibility Data  
Serving APIs

# Help us make sidewalks more accessible for everyone

Participate

Use our tool to label accessibility attributes in

The collected data is stored on our server and

The data will be used to enable new accessibility-

# 3

## Deployed since Fall 2016!

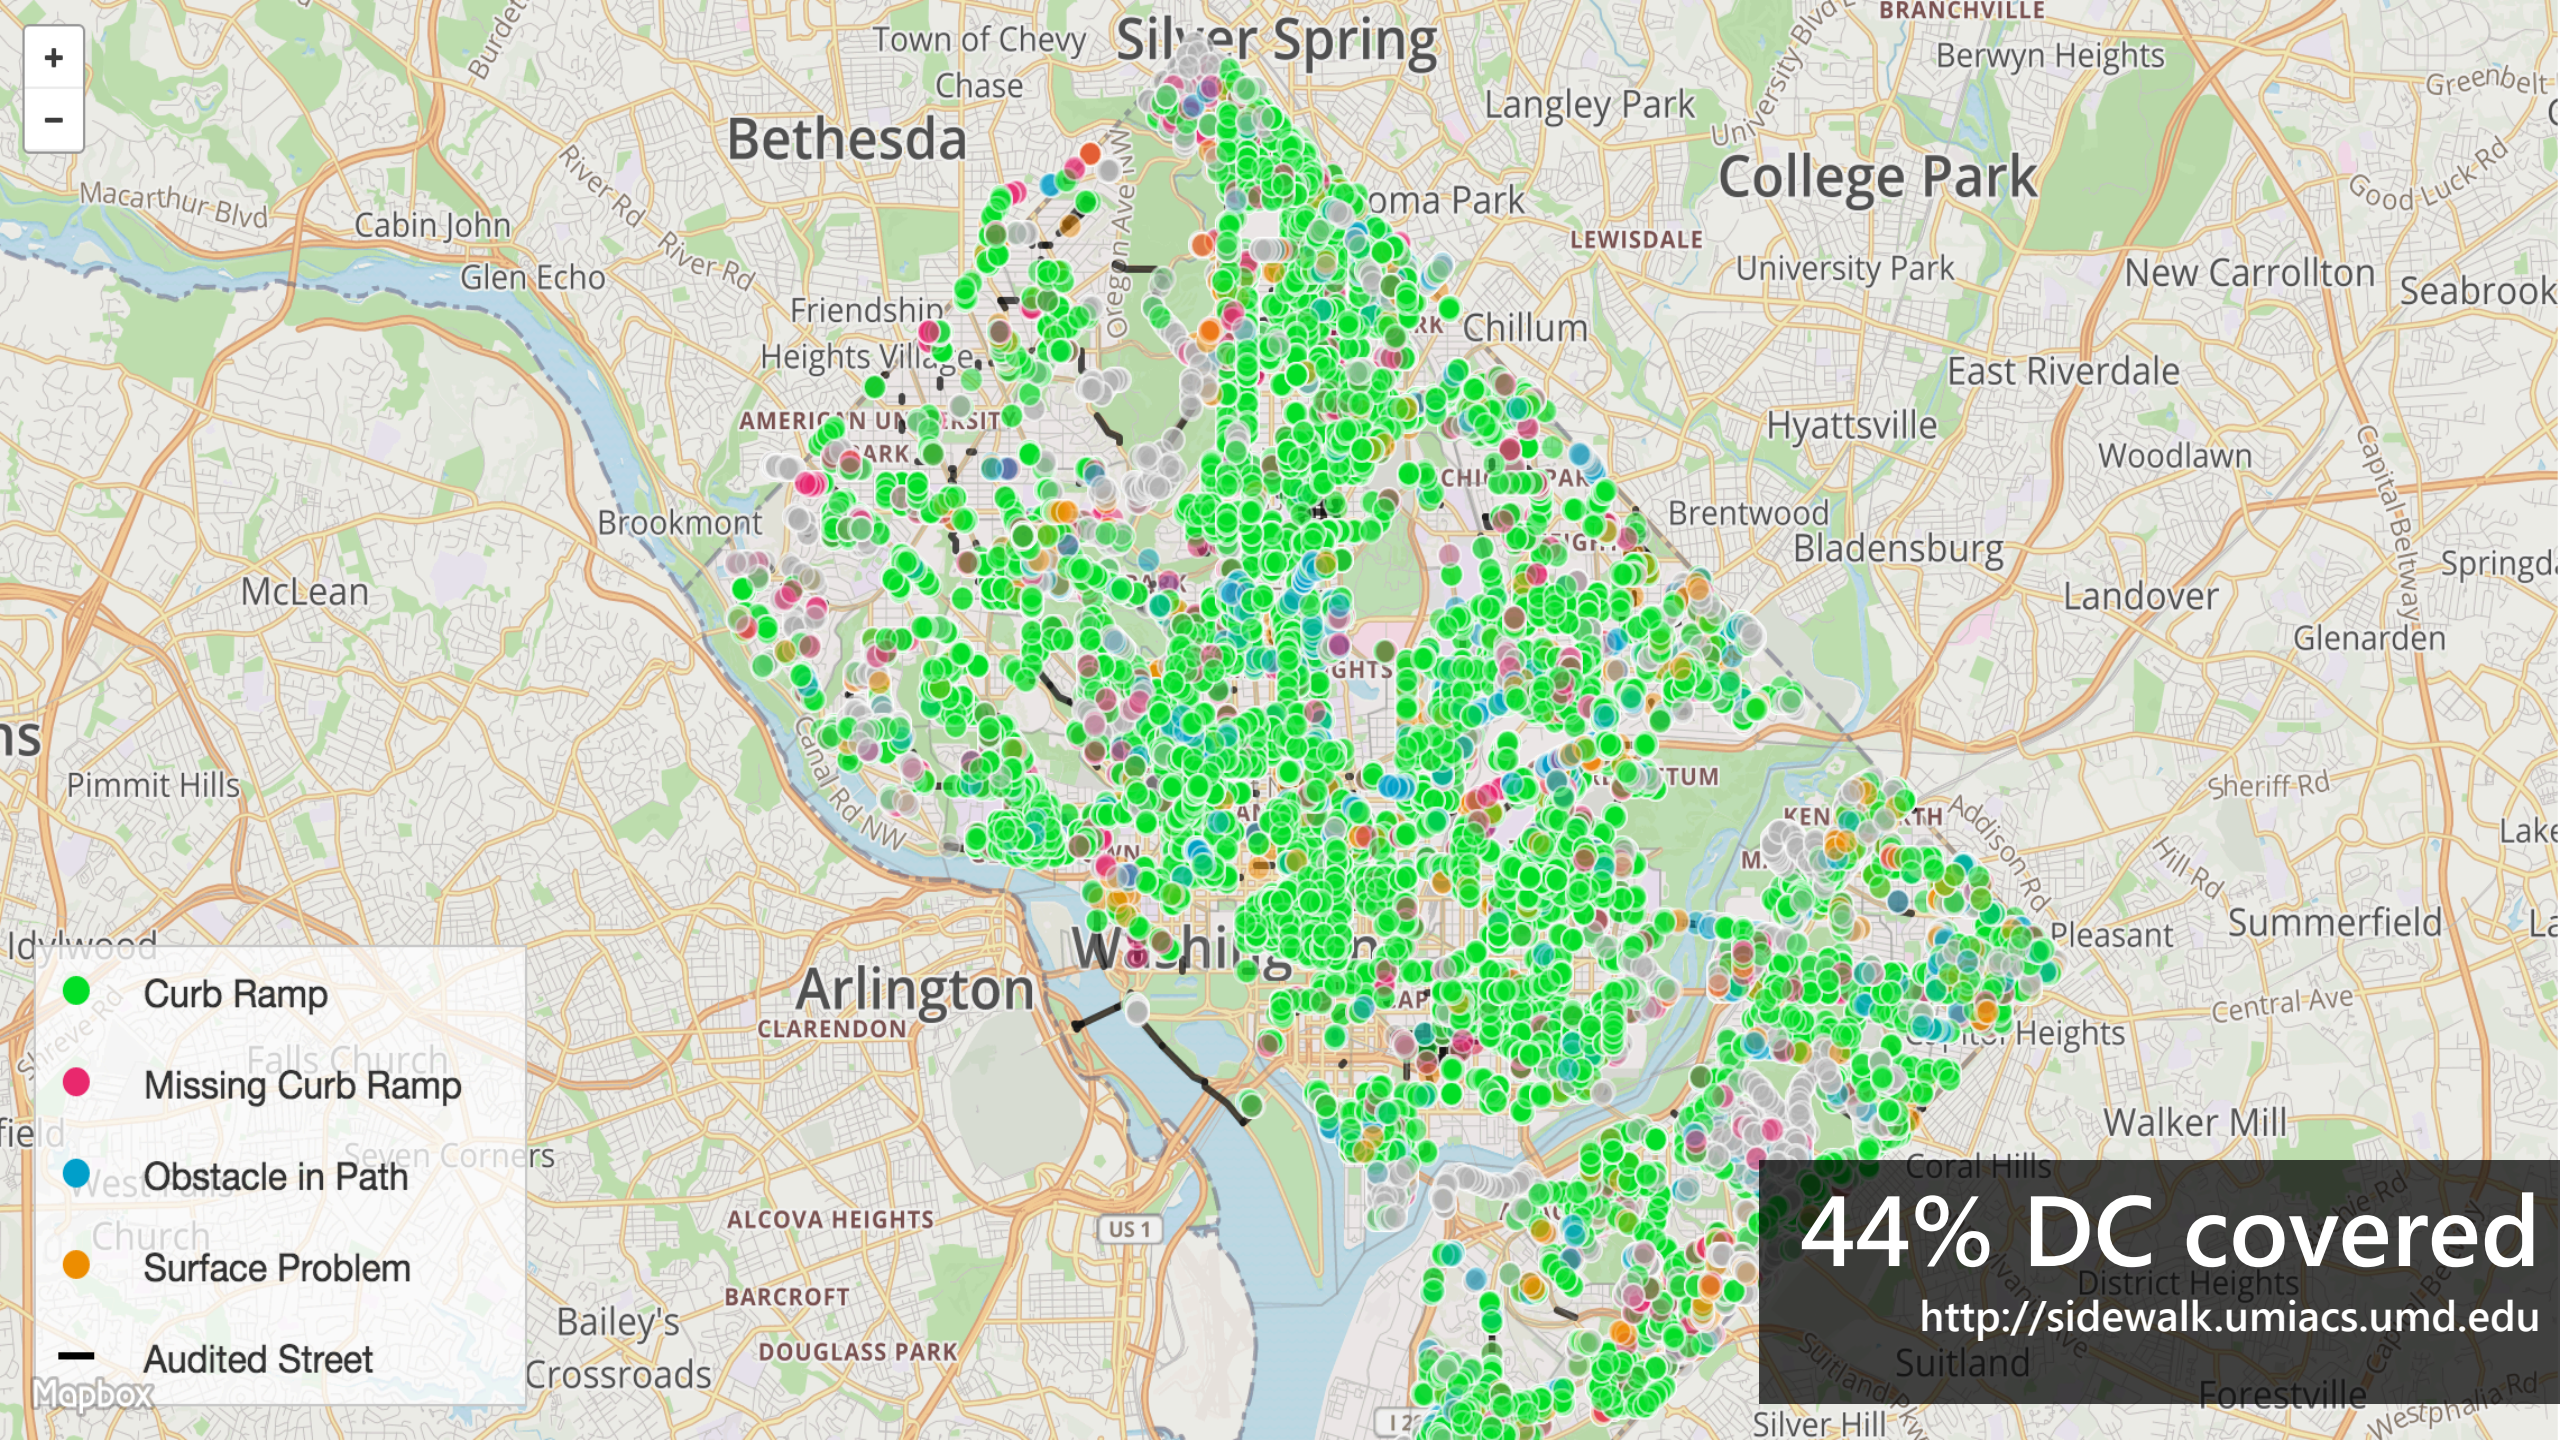

>64000 labels collected

22572 problems points identified

44% of DC covered ~ **463** miles!

475 users contributed, 277 registered users

- Curb Ramp
- Missing Curb Ramp
- Obstacle in Path
- Surface Problem
- Audited Street

**44% DC covered**  
<http://sidewalk.umiacs.umd.edu>

# Future Work

Cover 100% of DC

Build *amazing* accessibility-aware tools

Integrate automated methods for labeling data  
(psst..remember Tohme?)

Continue to make the tool AWESOME! 😊
